# Ronel Sajan Peter

Software Engineer

linked.in/ronelpeter  
www.mojojoj0.github.io

**Impact:** Increased customer satisfaction and retention at TVC by taking on new challenges, which significantly helped in new customer acquisitions.

## EDUCATION

**Software Engineering, Java Immersive Program**, General Assembly, Remote Dec 2021 — Mar 2022  
**Associates in Science, Enterprise Development**, Oklahoma State University - Oklahoma City July 2013

## PROJECTS

**Built Angular Web App**, General Assembly Dec 2021 — Mar 2022

- Used TypeScript and Angular framework to build a Travel Community web app in order for users to share tips about their favorite locations around the world.
- Utilized wireframes, sprints, user stories, git collaboration, and pair programming to reach end result. Used an API call to display weather. Web app features multiple pages for users to navigate and leave comments.

**Developed Java REST API**, General Assembly Dec 2021 — Mar 2022

- Managed a SQL database with CRUD functions using Postgres in order to mimic pillpack.com with added features so that a user can manage a health care dashboard for themselves and other family members.
- Used Spring Boot to create a RESTful backend, implemented strategies for handling failure, and used postman for endpoint testing.

**Created JavaScript Tic-Tac-Toe & Added Animated 3D Modeling to Portfolio Website**, General Assembly Dec 2021 — Mar 2022

- Programmed a noughts and crosses game with reset button using vanilla JavaScript, HTML, and CSS. Utilized 2 different colors instead of markings. Deployed via Netlify. UI/UX design was inspired by Netflix's Squid Game.
- Built a personal portfolio page, deployed via GitHub pages. Configured a geographic generic top-level domain (.cat) and enforced HTTPS encryption. Utilized Three.js library to display animated 3D computer graphics. UI/UX design inspired by vaporwave & outrun aesthetics.

## EXPERIENCE

**Bilingual Legal CSR & Fuel Card Sales** July 2013 — June 2019  
TVC Pro-Driver Oklahoma City

- Assisted customers with case management and acted as a liaison between the clients and the attorneys. Provided customers with detailed information regarding the product and services offered for better decision making.
- New and Existing Customer relationship management with account information and issue resolution.

**Logistics Specialist & Yard Jockey Specialist** Oct 2017 — June 2018  
Amazon Oklahoma City

- Coordinated transportation requirements between the Sort Center, Transportation Operations Center, Fulfillment Centers, and the local logistics service providers.
- Duties Included: Daily load plan development, Trailer pool requirements, Carrier pickup, delivery issues, and System data integrity issues. Consolidated from multiple data sources and generated weekly metrics and daily reports to support business needs.

**Wellness Center Attendant** Jan 2009 — Nov 2017  
Oklahoma State University - Oklahoma City Oklahoma City

- Monitored and maintained fitness center amenities and equipment. Ensured center rules, safety standards, and sanitation requirements are followed.
- Scheduled orientations for patrons. Assisted in the inventory and requisitioning of supplies and parts for the fitness room.

## SKILLS

**Full Stack Developer** - JavaScript, Angular, Java, Spring Boot, Git, TypeScript, SQL  
**Interests** - Blender, Three.js / WebGL 3D Rendering, Next.js, UI/UX Design  
**GitHub** <https://github.com/MOJOJOJO>  
**Natural Languages** - English, Hindi, Malayalam
